International Baccalaureate World School

The International Baccalaureate (IB) is an educational programme developed by the International Baccalaureate Organization, headquartered in Geneva, Switzerland. Our students of the IB course can obtain an IB Diploma, a qualification for entering domestic and international universities.

Develop students' identities, give them self-confidence, and send them out into the world

Our educational philosophy is "life training through the development of individuality. Through inquiry-based learning, students deepen their understanding of traditional Japanese culture, the environment, and the SDGs. After graduation, they pursue specialized fields such as medicine, nursing, veterinary science, aviation, science, art, and music, playing active roles on a global stage.

English Immersion Education

Most subjects, except for Japanese, are taught in English. At the same time, Japanese language classes are provided to deepen students' understanding in both languages. Many high school students achieve high proficiency, with IELTS scores of 8.0 (out of 9.0) and Eiken Grade 1.

A Round Square Member School

Round Square is a globally diverse network of 245 like-minded schools across 50 countries on six continents. It offers world-class programs and experiences that enhance students' global competence, individuality, and confidence.
